Objective

I am an enthusiastic developer seeking an entry-level software development position focusing on full-stack development.

Technical Skills

- **Languages:** C, JAVA, PHP, XML, SQL, HTML, CSS, JavaScript, ReactJS, NodeJS, ExpressJS (MERN), React Native.
- **Software:** NetBeans, MongoDB Compass, Tableau, PowerBI.
- **Version Control tools:** Git

Some recent projects

1. [Blog Post Website:](#)
This blog post website is a virtual space where creators express their thoughts, share experiences, and provide valuable information on various topics. The websites typically feature a collection of articles or blog posts, organised chronologically or by categories, allowing visitors to explore content based on their interests.
2. [AgriiVision: Smart Plant Disease & Weed Detection](#)
AgriiVision is a cutting-edge platform offering Smart Plant Disease Detection for agriculture. Packed with advanced features such as a user-friendly interface. The application utilises technologies like React JS, FastAPI, HTML, CSS, Python, TensorFlow, OpenCV, and Keras. Adding an AI-based chatbot enhances user interaction, making AgriiVision a comprehensive solution for modern and efficient agricultural management.
3. [Random Quote Generator:](#)
The Random Quote Generator with External API is an improved version of the quote generator, offering a wider range of quotes by fetching them from an external source using an API. This modern and interactive web application is built using HTML, CSS, and JavaScript
4. [E-facteur \(Ongoing\):](#)
A comprehensive web application for efficient online courier service management.
5. [Portfolio Website\(Ongoing\)](#)
This project showcases my skills, projects, and experiences in the field of Full-Stack Development. The website is designed to provide an interactive and visually appealing representation of my work.
